
Tips for Checking Your Insurance Benefits for A Formal Evaluation

To determine your insurance benefits prior to coming in for a Formal Evaluation, you may contact your insurance provider directly and follow the steps below:

- Call the Member Services number located on your insurance card.
- Ask the representative what the benefits are for a Specialist Office Visit and a Duplex Scan (CPT Code 93970) for symptomatic varicose veins.
- Be sure to ask if there are any **waiting periods for pre-existing conditions** or **exclusions** on your policy for treatment of varicose veins* .
- If your policy requires referrals for specialty services, please be sure to obtain a referral from your Primary Care Physician prior to coming into our office for treatment.

Please Note: If you are a candidate for the Closure Procedure, Maryland Vein Professionals will check into your insurance benefits for those services once you have *scheduled* your Closure appointment(s).

* Some CIGNA plans, in particular, have specific exclusions for treatment of varicose veins, regardless of whether or not it is medically necessary.
